

Extraterrestrial Travel Log

The Scenario

Max is an extraterrestrial who lives light years from Earth. His planet is very different from ours – everyone is identical and there aren't any plants, animals, rivers, mountains or forests! In fact his planet's landscape looks a lot like the surface of the moon.

So you can just imagine how surprised Max was when he came to Earth one day in a spaceship! So much diversity! Such abundance! New things he had never seen before! Imagine you are there to meet Max when he arrives on Earth to be his guide.

The Mission

Your mission as an Earthling is to explain where all this diversity comes from, why it is important and why it is so precious to us. Make a little travel log to tell about your adventures with this extra-terrestrial and make sure you also draw some pictures of you and Max on our beautiful planet!
